Carbon Reduction Plan - 31/03/2024

Supplier name: Miller Knight Resource Management Ltd ("Miller Knight")

Publication date: 23/07/2024

Commitment to achieving Net Zero

Miller Knight is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2024 (up to 31/03/2024)

Additional Details relating to the Baseline Emissions calculations.

Scope 3 Emissions currently include the following limitations on reporting data. This will be reviewed and corrected where possible on next year's Carbon Reduction Plan:

- Transport and distribution of goods to the business data not currently available
- Waste from operations data not currently available
- Business Travel data not currently available
- Employee commuting we are investigating development of an annual staff travel survey which will inform accurate emissions for this category.
- Transportation for goods to clients this is Zero due to the nature of our business.

Baseline year emissions:

| EMISSIONS | TOTAL (tCO ₂ e) |
|-----------|----------------------------|
| Scope 1 | 137.60 |
| Scope 2 | 8.90 |

| Scope 3 (Included Sources) | 0.85 (Water usage and electricity distribution) |
|-------------------------------|---|
| Total Emissions | 147.35 |

Current Emissions Reporting

| Reporting Year: 2024 (up to 31/03/2024) | |
|---|---|
| EMISSIONS | TOTAL (tCO ₂ e) |
| Scope 1 | 137.60 |
| Scope 2 | 8.90 |
| Scope 3 (Included Sources) | 0.85 (Water usage and electricity distribution) |
| Total Emissions | 147.35 |

Carbon Emission Intensity Ratio (Total Emissions / £1m turnover): 6.10 tCO2e

Emissions reduction targets

We project that carbon emissions will initially increase over the next five years as we more accurately calculate our Scope 3 emissions. We are not yet able to accurately quantify this value.

As such we feel it is not wise to set a target for this period. This will be reviewed in next year's Carbon Reduction Plan reporting.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

This is the first year of formal reporting of our Carbon Reduction Plan. As such there has been no change against the 2024 baseline.

Going forwards, we will report against the new initiatives taken.

In the future we hope to implement further measures such as:

- More accurate reporting of Scope 3 Emissions (this will result in a temporary increase in emissions as they are more accurately calculated)
- Increase in low emission vehicles
- Reduction in fuel usage by maximising online meetings and encouraging vehicle sharing when attending site.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of Miller Knight:

Jeremy Warman Chief Operating Officer
